**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eller or Kumada in view of Grunwald et al. Eller or Kumada discloses the claimed invention except for utilization of a plurality of heating coils, one having a smaller diameter than the other. Grunwald et al teaches that it is known to provide a heating filament (33) with a plurality of coils (35,37) with the inner coil (35) having a smaller diameter than the outer coil (37) as set forth at column 2, lines 38-61. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the of glow

plug of Eller or Kumada by providing the heating filament be a plurality of heating coils, one having a smaller diameter than the other as taught by Grunwald et al in order to provide for a quicker, more concentrated heating of the glow plug. Further, it would have been an obvious matter of design for one having ordinary skill in the art at the time the invention was made to provide the inner and outer coils of the heating filament of Grunwald be wound in opposite directions since applicants has not disclosed that the particular wounding arrangement of the coils solves any stated problem or is for any particular purpose and it appears that the heating filament of Grunwald would perform equally well with such an arrangement.

### ***Conclusion***

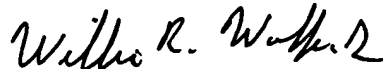

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference of Kaczynski et al is cited to show a glow plug with heating and control filaments.
